Resume Gaps Report

Resume: **Muhammad_Shahid_FullStackDeveloper.pdf** (Muhammad Shahid — Junior Full-Stack Developer)
Website: awesome-portfolio (src/content/*.js, JSON-LD, OG image) · Date: 2026-10-07

> **Summary:** Resume provides roughly half of what the website needs — identity, contact, GitHub/LinkedIn, React/Next/Node/Express/JWT/Vercel skills and 4 projects. Missing: experience dates, achievement metrics, TypeScript, Tailwind, PostgreSQL, Socket.IO, accessibility, testing, performance skills, and the Healthcare / IoT / Wellness domains. Fill these gaps before updating the website.

1. Profile & Identity Gaps

Website needs	Resume status
Portfolio website URL (site.url)	**Missing** — no portfolio/website URL in resume
Current employer (worksFor JSON-LD + site.employer)	**Missing** — no current role; last: SMIT (intern/apprentice)
City + region format (e.g. "Karachi, Sindh")	**Partial** — "Karachi, Pakistan" present; region derivable

2. Experience Gaps (biggest)

Website needs	Resume status
Exact dates — "Jan 2024 → Present" format	**Missing** — only durations ("3 months", "1.5 years"); no start/end month-year
One current role (title @ company)	**Missing** — two separate roles (Intern + Apprentice), both at SMIT, no present role
Metrics/numbers — 45% fewer defects, 30% less duplication, 90+ Lighthouse	**Missing** — resume has **zero** quantified metrics
Role tech stack — TypeScript, Tailwind, shadcn/ui, TanStack Query, React Hook Form, Zod, Axios, Socket.io, ZegoCloud, OAuth 2.0	**Missing** — only React/Next/Firebase/JWT overlap
Responsibilities depth — architecture standards, component library, refresh tokens, HTTP-only cookies, Core Web Vitals, optimistic updates, Agile/Scrum, sole frontend engineer	**Missing** — only generic bullets: REST APIs, JWT, RBAC, Git
Company location meta	**Partial** — "Karachi" in words only

3. Skills Gaps — checklist

✓ = in resume ⚠ = partial/ambiguous ✗ = missing from resume

Group	Skill	Status
Core stack	React.js, Next.js, Node.js	✓
Core stack	**TypeScript**	✗
Core stack	**PostgreSQL**	✗ (MongoDB instead)
Frontend	JavaScript ES6+, HTML5, CSS3	✓
Frontend	**Tailwind CSS**	✗ (only CSS3)
Frontend	**shadcn/ui**	✗
State & Data	**TanStack Query**	✗
State & Data	Redux Toolkit / RTK Query	⚠ resume says generic "Redux" only
State & Data	**Zustand, Context API**	✗
Backend	Node.js, Express.js, REST	✓
Backend	**Drizzle ORM**	✗ (Mongoose instead)
Auth	JWT	✓
Auth	RBAC (role-based access control)	✓
Auth	**OAuth 2.0 (Google sign-in)**	✗
Real-time	Firebase	✓
Real-time	**WebSockets, Socket.IO**	✗ (LiveKit = video only)
Real-time	**ZegoCloud**	✗
Real-time	WebRTC	⚠ LiveKit is built on it; not named
Integrations	**Google Maps API, MetaMask**	✗
Forms	**React Hook Form, Zod**	✗
Performance	**Virtualization, AbortController, Debouncing, Caching, Lazy Loading, Code Splitting, Web Vitals, Lighthouse, Chrome DevTools, Memoization, Image Optimization (11 items)**	✗ — nothing in resume
Accessibility	**WCAG 2.1, Semantic HTML, ARIA, Keyboard Navigation**	✗
Testing	**Vitest, React Testing Library**	✗
Tools	Git, GitHub, Vercel, Postman	✓
Tools	**GitHub Actions (CI), Vite, Netlify, Axios**	✗

Score: website shows ~60 distinct skill items; resume covers ~20. ~40 missing.

4. Domain Gaps (Experience page)

Website domain	In resume?
Healthcare SaaS (clinical chat, tele-consultation, WCAG)	✗ No
IoT (fleet management, live maps, device onboarding)	✗ No
Wellness & Analytics (dashboards, Web3/MetaMask)	✗ No
Resume's own domains: EdTech (madrasa LMS), E-commerce, client landing pages	No dedicated space on website

5. Project Gaps (Work page)

Website needs per project	Resume status
Case-study depth — challenge, approach[], features[], engineering[5]	**Missing** — resume projects are only 1–2 bullets
Project stack — TypeScript, PostgreSQL, Drizzle, OAuth, WebSockets, Binance/GitHub API	**Mismatch** — resume: MongoDB, Cloudinary, Firebase, LiveKit
GitHub link per project	**Partial** — EasyShop ✓, AirForShare ✓; **Madrasa & Fictive GitHub links missing**
Demo links	✓ all 4 present in PDF
3 projects needed, resume has 4	✓ fine

6. About Page Gaps

Website needs	Resume status
Stat "~3yrs building production web apps"	**Conflict** — resume total ~1.75 yrs (1.5 + 3 months)
Stats: 45% / 30% / 90+ Lighthouse	**Missing** — no such numbers
Journey story — healthcare deep end → API → full stack	**Mismatch** — resume: apprenticeship → internship → junior role
Principles — clinical chat reliability, WCAG, Socket.io/ZegoCloud notes	**Mismatch** — no matching experience
everydayTools — TypeScript, PostgreSQL, TanStack, Socket.IO, Tailwind	**Missing** — 5 of 8 missing (see section 3)

7. Reverse Gaps — in resume, but website has no field

- **MongoDB, Mongoose** — website backend group demands PostgreSQL/Drizzle
- **Supabase, Cloudinary** — no field on website
- **LiveKit** — website real-time group shows Socket.IO/ZegoCloud
- **VS Code, npm/yarn** — not in tools group
- **Education & Certification** (SMIT bootcamp, Matriculation) — website has no education section
- **Phone number** (+92-308-3647124) — contact page has no phone field (email is primary)

8. Skill-Building Priority (for resume/work)

Tier 1 — used on every website page:

- **TypeScript** — core stack, projects, experience tech all require it
- **Tailwind CSS** — frontend group + every project stack
- **TanStack Query** — data-fetching conventions + everyday tools
- **PostgreSQL + Drizzle ORM** (or decide to keep MongoDB track and change the website's backend group)

Tier 2 — large experience/skills groups:

- **Socket.IO / WebSockets** — real-time group + experience tech
- **React Hook Form + Zod** — forms group + "45% fewer form defects" story
- **OAuth 2.0** — auth group + Task Flow project
- **Performance set** — Web Vitals, Lighthouse, code splitting, lazy loading, memoization (whole group 08 + 2 stats)
- **Accessibility set** — WCAG 2.1, ARIA, semantic HTML (group 09 + healthcare domain)

Tier 3 — for depth:

- **Testing** — Vitest, React Testing Library
- **GitHub Actions (CI)**, Vite
- **Redux Toolkit / RTK Query / Zustand** — resume only has generic "Redux"
- **ZegoCloud / WebRTC**, Google Maps API, MetaMask — only if changing domains

Resume-writing tasks (info to fill, not skills):

- Add **exact start/end dates** for every role
- Write at least **2–3 quantified metrics** (defect %, perf score, bundle size, users, load time)
- Add **challenge/approach/features** depth to project sections
- Add GitHub links for the **Madrasa & Fictive** projects
- Add a **portfolio website URL** once this site is deployed
- State "~1.75 yrs" experience honestly or strengthen it with metrics
